## Education

- **B.Tech in Computer Science**  
Federal University of Technology, Owerri | 2014-2019
  - **Senior School Certificate**  
Archdeacon Joseph College, Mbutu, Osisioma, Abia State | 2013
- 

## Professional Summary

Passionate and skilled software developer with expertise in creating and managing web applications using Flask, JavaScript, and various web technologies. Proven experience in developing responsive user interfaces, implementing secure authentication mechanisms, and generating professional-grade reports. Adept at optimizing systems for performance and user experience, with a strong foundation in problem-solving and teamwork.

---

## Skills Summary

- **Languages:** Python, JavaScript, PHP, SQL
  - **Frameworks:** Flask, Bootstrap, Laravel
  - **Libraries & Tools:** Flask-SQLAlchemy, Flask-Migrate, WeasyPrint, Jinja2
  - **Database Management:** MySQL, SQLAlchemy
  - **Platforms:** Linux, Windows, Visual Studio Code
  - **Web Technologies:** HTML, CSS, JavaScript
  - **Version Control:** Git/GitHub
  - **Soft Skills:** Problem Solving, Team Collaboration, Strong Communication
  - **IT Management:** Experienced in managing large-scale IT deployments
- 

## Professional Experience

### Software Developer (Freelance)

Mr Solution Tech – *May 2025 – July 2025*

- **Built a cybersecurity platform** featuring QR code generators, code encryption tools, and developer utilities using Laravel and Tailwind CSS, showcasing scalable and secure architecture.

- Engineered both frontend and backend components, ensuring clean, maintainable code with secure authentication and robust validation.
- Designed a modular UI with Tailwind CSS, prioritizing usability and mobile-responsive layouts.
- Integrated a QR code generation service and encryption endpoints, allowing seamless generation and secure handling of sensitive data.
- Collaborated with stakeholders to iterate features based on feedback, delivering a polished, production-ready platform aligned with Mr Solution Tech's brand and technical standards.
- Ensured performance optimization and security best practices throughout the application deployment.

**Key Technologies:** Laravel (PHP framework), Tailwind CSS, RESTful endpoints, secure coding practices, responsive design.

#### **Web Developer (Freelance)**

**Aunty Anne's International School** – *September 2024 – November 2024*

- Designed and built a fully responsive, professional website for Aunty Anne's International School, showcasing their mission of practical learning, knowledge empowerment, and confidence building.
- Created key pages and features including:
  - About Us (Mission, Vision, Core Values)
  - Programs (Early Years, Primary, Secondary levels)
  - Admissions and News sections
  - Parent resources: downloadable handbook, portal integration
  - Contact & Gallery sections, plus newsletter signup forms
- Integrated a secure student/admin portal system for login-based access to academic and administrative resources
- Included institution highlights: 95% exam pass rate, top 5% ranking in Nigeria (2024), 100% university placement
- Embedded testimonials from alumni, parents, and current students to reinforce credibility and showcase community impact.
- Optimized for SEO, mobile responsiveness, and ease of updates for school staff handling news, admissions, and program changes.

**Key Technologies:** Laravel (PHP framework), Tailwind CSS, RESTful endpoints, responsive design.

**Software Developer (Freelance) - *May 2024 – August 2024***

**GIGACAD – School Management System**

- Developed a comprehensive student and admin portal to manage student information, results, and academic records.
- Designed a secure results management system with features like PDF reports, email notifications, and scratch card authentication.
- Built responsive UIs using Flask, Jinja2, and Bootstrap, ensuring a seamless user experience.
- Integrated international-standard result sheets using WeasyPrint for A4 paper compatibility.
- Enhanced system security with CSRF protection and role-based access controls.

**Key Technologies:** Flask (Python framework), Bootstrap, responsive design.

**Web Developer (Freelance) - *March 2024***

**Akuegbe Williams Portfolio Website**

- Created a dynamic homepage with interactive navigation and a professional introduction.
- Developed a secure contact form using PHP with server-side validation.
- Designed a responsive layout using HTML, CSS, and Bootstrap, ensuring optimal viewing across devices.

**IT Facilitator | Spiral Tech Network Limited - *June 2022 – August 2022***

- Trained over 100 students in foundational programming concepts, algorithmic thinking, and basic HTML and CSS templates.
- Facilitated hands-on workshops and guided students through practical exercises, fostering a strong understanding of web development fundamentals.
- Encouraged collaborative learning, helping students to build their first web pages and understand the importance of clean, maintainable code.

**Lead IT Coordinator | Bliz Ventures Enterprise - *March 2019 – September 2019***

- Managed a team of over 100 field agents during the Tradermoni scheme, ensuring efficient app deployment during mass registration and loan disbursement across Abia State.
- Provided real-time technical support, reducing downtime and enhancing operational efficiency.
- Conducted training sessions for field agents, resulting in a significant reduction in user errors and increased app adoption.
- Played a key role in the successful disbursement of microloans, boosting financial empowerment across various regions.

**Andela Learning Community | Web Specialist Trainee  
2021**

- **Advanced web development skills through rigorous training focused on JavaScript, APIs, and responsive design.**
- **Developed a fully functional contact application, showcasing proficiency in modern web technologies.**
- **Engaged in collaborative learning sessions, strengthening teamwork and problem-solving abilities.**

**ALCwithGoogle | Web Development Trainee  
2020**

- **Mastered the fundamentals of professional web development, including HTML, CSS, and JavaScript.**
- **Developed dynamic web applications, including a pixel-art mixer, demonstrating front-end development skills.**
- **Collaborated in a peer-learning environment, improving problem-solving and understanding of real-world challenges.**

---

**Certifications**

- **Programming in Python (Meta) | 2023**
- **Google Africa Mobile Web Specialist (ALCwithGoogle) | 2021**
- **Web Development Beginner (ALCwithGoogle) | 2020**
